

## **JDE Experience**

### **United Kingdom**

**Mar 2002 July 2003. Emerson Process Management Ltd**, Bognor Regis, UK.  
Applications and operations technical business analyst and administrator.  
Initially the role provided development of extensions and customisation of JDE applications for a global enterprise. The operation provided services from the USA, throughout the UK and Europe, Russia, Asia to Singapore. The demands for 24 hour operation and support were substantial. Subsequently the responsibilities transferred to operational support, development of monitoring tools, and creation of operational efficiencies.

This role provides support to both operations, in terms of security, OS/400 management, upgrades etc., BRMS, job scheduling and also to the applications group. The latter includes change control (Aldon CMS), application support and developing extensions and interfaces, maintenance and enhancement of JDE system. Significant success in overcoming system monitoring issues and, in particular, resolving OS issue to allow an upgrade path.

**1993-94. Josiah Wedgewood**, Stoke UK, contract Analyst/Programmer.  
BPCS and JDE manufacturing and inventory implementation, interfacing JDE stocktaking functions to BPCS inventory processing. Successfully developed and implanted enhancements and improvements to client requirements.  
RPG400, AS/SET and SQL developments with upper case design tool usage.

### **New Zealand**

**Dec 1997 – Jan 1998 contract Analyst/programmer.**

**JD Edwards NZ.**

RPG400 development project, in the grain and farming support industry, Auckland and Wellington.

Application extensions in the order processing, document printing areas.

I was offered a permanent role.

**1986 – 1987 contract Analyst/programmer.**

**JD Edwards NZ.**

RPG400 development project, for a refrigerated freight company in Auckland.

Application extensions in the order processing, inventory and related areas.

I was offered a permanent role, but head-hunted by IBM for a key project elsewhere.
