Qualified for NZCS Fellowship

Team Leader release, change management & regression testing at EDS Group

March 2008 - December 2008 (10 months)

Development Support Team Leader on Telecom NZ (ICMS) project.

Software Release Manager - ICMS on IBM i.

Enhanced & automated aspects of change control & release preparation process & systems

This activity removed much of my day to day duties, which encouraged me to seek the NZCS role

QA (testing), change control & release management leader, development support specialist

- Supervised team of 4, personally responsible for revising & updating ICMS release management process, software, authorities and audit compliance.
- Automation of the release process effectively removed a large part of my day to day work.

There being inadequate challenging work apparently remaining & no alternative roles available with EDS, I resigned to assist NZCS.

Given 2 prior successful personal experiences of (computer society) professional certifications, I was considered an SME

- Release manager for testing and change management aspects of the release process; liaised with development team, project staff & implementation team to facilitate release process

Senior Analyst Programmer

October 2006 - March 2008 (1 year 6 months)

CA 2e (Synon) Cobol & RPG, IBM i Environment.

Application support and development of many custom wool industry applications

- Data extraction and (EDI) electronic data transmission enhancements.

- Developed automated email notification system to monitor/report on after hours batch operations
- 2nd level support tasks, web site additions, operating system support responsibilities

Contract Senior Analyst/Developer at EDS Group & NHP Electrical

February 2006 - October 2006 (9 months)

EDS Melbourne

- * IBM i Synon/2e, RPG environment, Wilcom Forms Server
- * Vic Roads (vehicle licensing authority). Developed and implemented securities register, (Interest Expiry Advice), modifications & migration to 2 tier printing/faxing/emailing solution, working onsite at the Kew head office
- * IBM i system monitoring, MQ Messaging, Robot, BRMS
- * Subsequently offered other contract work for General Motors but unavailable

NHP Electrical

- * Custom external interface investigated & developed in RPG 3 for BPCS ERP application
- * Autonomous role, supposed to be contract to permanent

Contract Business Analyst (Testing/Implementation)

November 2004 - February 2006 (1 year 4 months)

Contract Business Analyst, Project Implementation and Test Analyst,
IBM i CA 2e (Synon) enhancements & business requirements for Mortgage and leasing systems

- * Semi-technical role, mostly using MS products in a mixed Synon and Java environment.
- Tested application changes etc. using MS products, Mercury Test Director, Jira, and Lotus Notes
- The role included business analysis and design, project management, application change testing, implementation support and general user support
- Implementation of Mercury Quality Centre for business area.

- Roll-out and trained users for RSA token based security system for remote access to NSW, Queensland & Victorian clients.

- * Development assistance, technical and user manual & other document revisions, business requirements definition, technical design, SOX compliance documentation generation & approvals for changes.

3 contract extensions

- * Responsible for system design, technical and user documentation, QA, UAT testing & general business support

- * SOx compliant documentation & procedures.

- * Gained membership of Australian Computer Society, life membership of British Computer Society,

- * Completed distance learning from the UK in Life Skills Counselling also Performance Coaching (business environment)

- * Australian Bus/Truck driving accreditation & authority

Senior Analyst (Development/testing/implementations/OS Upgrade) at Finzsoft Solutions (NZ) Ltd

December 2003 - November 2004 (1 year)

- * Senior IS Specialist, IBM i Advantage/2e/Synon2E/COOL2E enhancements to Sovereign Financial package, a large and complex banking package & its implementation of the revised software at 5 client sites

- * Assisting Project Manager and twice rescuing development schedule.

- * Analysis and programming using Advantage/2e/Synon2E/COOL2E, RPG, CL

- * FTP, packaging, client implementation & consulting

- * Also contributed with multiple client software upgrades and implementation of V5R3 for St George Bank. This regularly required working weekends & all night when needed

- * Software evaluation of configuration management & automated testing aids packages:

- * Rational Robot

- * Mercury QuickTest Pro

- * Silk Test

- * Original Software Testbench

Gained P endorsement for public vehicle diving

Continued to study psychology based courses, distance learning from the UK

Gained membership, British Computer Society
